

37% PROTEIN RANGE BLOCK

PRODUCT CODE: Y5007BLK

FORM: 33 lb block

APPLICATION:

A self-fed source of protein for beef cattle on pasture.

FEEDING DIRECTIONS:

Provide one block for every 5-15 head of animals. After acclimation, consumption should be approximately 1 to 2 pounds per head daily. If consumption is too high, move block(s) farther away from water source and high traffic areas. When first introducing the block, consumption levels can vary considerably. Do not feed to starving animals. Consider offering some free choice salt beside the block if initial consumption is too high. Always ensure there is plenty of fresh clean water and forage available.
